## **e-instruments Announces Session Keys Electric W Iconic Electric Piano For Kontakt And Kontakt Player**

*e-instruments/ Hamburg, October 17th, 2018 - e-instruments today released Session Keys Electric W – an exquisitely sampled electric piano for Kontakt, based on a genre-defining piano legend.*

Session Keys Electric W combines authentic sound, flexible operation, and unique controls to make it feel like you're playing the real thing, producing sounds you wouldn't imagine were created electronically.

### **A faithful reproduction of a musical time machine**

To replicate this hit-making electric piano, e-instruments turned every stone for a suitable original, which underwent further specialist restoration to bring it painstakingly back to peak condition.

It was recorded in two different ways, to create two separate sound sets:

- **Studio** represents the direct unaltered line-out sound, and
- **Live**, which reproduces the sound of the speakers through an expertly positioned microphone setup.

**The faithful recording creates all acoustic noises and resonances together with the pure acoustic sound, giving the user the option to blend acoustic and electric sound.**

### **Surpassing the original**

*Session Keys Electric W* offers much more than a precise image of the original electric piano sound. Besides 35 inspiring sound presets, tuning options and powerful effects its compelling play assistance and production tools include:

- The Pentamorph giving the classic instrument complex new sound options. Blend from the pure electric piano to reversed sounds via other complex tones, all with one control.
- The Animator commands more than 440 ready-to-play professional licks and phrases in different genres and styles. Phrases follow keys and harmonies while providing complete control over dynamics and complexity using the pitch bend and modulation wheels.
- The Smart Chord function to create instant piano chords from single keys or pads.

*Session Keys Electric W is fully Native Instruments NKS compatible. NKS provides seamless integration with NI's Komplete Kontrol keyboards and offers visual feedback of parameters, key switches and even notes the Animator is playing.*

### **Pricing:**

Session Keys Electric W is now available from the e-instruments online store for 79 € / 79 \$

Special upgrade offer for Session Keys owners: 49 € / 49 \$.
